KASHISH VINAYAK

Bay Area, CA | kashish_vinayak@berkeley.edu

EDUCATION

University of California, Berkeley — B.A. Data Science, Society & Technology Graduating May 2027
Relevant Coursework: Data Structures, Principles & Techniques of Data Science, Data Mining & Analytics, Probability, Intro Database Systems, Intro Machine Learning
Global Study: UC Berkeley London Study Abroad Program, Spring 2026
Academic Honors: Valedictorian, Tennyson High School, 4.9 GPA
2nd Place — Forward Deployed Engineer Competition, SF Tech Week

EXPERIENCE

Formtek, Inc. — Technical Business Development & Research Intern — Walnut Creek, CA | Oct 2026 – Present
- Research engineering-intensive companies to identify enterprise software opportunities in CAD/BIM and engineering data management.
- Evaluate prospective customers, technical needs, and market opportunities to support business development strategy.

Farallon Capital Management — *Trading Ops Forward Deployed Engineer Intern* — San Francisco, CA | May 2026 – Sep 2026
- Built a Streamlit/Snowflake dashboard automating daily P&L verification, pricing checks, and reconciliation across financial systems.
- Developed Python tools to reconcile swap/CFD financing, identify cash breaks, and reduce false positives across Geneva and broker data.

Change Please — *Impact Data Analyst* — London, UK | Jan 2026 – May 2026
- Cleaned and structured multi-source datasets supporting audits, grant applications, and CRM migration.
- Built Tableau dashboards that translated complex impact data into clear insights for non-technical stakeholders and executives.

Handshake — *AI Trainer &Evaluator* — Dec 2025 – Jan 2026
- Refined prompt frameworks and evaluated LLM outputs for accuracy, safety, and quality, using structured feedback to improve model performance.

Savorly — *Software Developer & Product Lead* — Nov 2025 – Jan 2026
- Led product development of a surplus-meals app, translating user research and partner feedback into product requirements and features.
- Designed UI/UX in Figma and developed full-stack features using React Native, JavaScript, HTML/CSS, and AI tools.

Google — *Google Student Engineer* — Aug 2023 – Oct 2024
- Built interactive data visualizations and solved algorithmic problems using Python and C++ through engineering workshops.

Lawrence Berkeley National Laboratory — *Research Affiliate, Data Science* — Jun 2023 – Dec 2024
Analyzed large-scale scientific datasets using Python, Pandas, and Matplotlib to evaluate climate metrics and communicate research findings.
Built and designed a lab website to make complex research accessible to external audiences.

LEADERSHIP

UC Berkeley College of Computing, Data Science, and Society — *Cohort Lead* — May 2025 – Jan 2026
- Led orientation workshops and presentations for 35–40 incoming Data Science students while coordinating program logistics and engagement.
- Collected and synthesized student feedback to improve future programming and student experience.

SKILLS :

2nd Place Winner of Forward Deployed Engineer Competition at SF Tech Week
Product Strategy, User Research, Feature Prioritization, Product Roadmaps, UI/UX Design, Figma
Programming: Python, SQL, JavaScript, React Native, C++, HTML/CSS, Java, Scheme, TypeScript (Beginner)
Data & Analytics: Snowflake, Streamlit, Tableau, Power BI, Pandas, NumPy, Matplotlib, Markov Chain Monte Carlo
AI & Tools: Cursor, Claude, Git, ServiceNow, Prompt Engineering, Microsoft Excel
Leadership: Executive Presentations, Client Relations, Cross-Functional Collaboration, Team Facilitation
Languages: English, Punjabi, Hindi, Spanish (Conversational)
